

# BYDC — Build Your Dream Coin

## Official Whitepaper

### 1. Introduction

BYDC (Build Your Dream Coin) is a next-generation cryptocurrency project that bridges the world of digital assets with the growing industry of electric vehicles (EVs).

Our vision is to create the first crypto-based payment ecosystem designed for purchasing electric vehicles, paying for charging services, and enabling smart mobility transactions.

BYDC brings blockchain technology into real-world use, redefining how people buy, own, and interact with EVs.

Combining innovation, security, and real-world utility, BYDC aims to become the driving engine of a cleaner and more sustainable global economy.

This is not just another token — it's the power source of the future of mobility.

### 2. Vision & Mission

**Vision:**

To make BYDC the global leader in blockchain-based payment systems for electric vehicles and sustainable mobility.

**Mission:**

To empower individuals, merchants, and EV dealerships through a transparent, secure, and eco-friendly blockchain infrastructure that simplifies:

- Electric vehicle purchases,
- Charging payments, and
- All mobility-related digital transactions across global markets.

### 3. Tokenomics

- Total Supply: 500,000,000 BYDC
- Network: BNB Smart Chain (BEP-20)
- Decimals: 18
- Symbol: BYDC
- Distribution:
  - 40% Marketing & Strategic Partnerships Wallet
  - 60% Circulating Supply for liquidity and ecosystem growth
- Smart Contract Address: 0x370f6AaccC692d4c1A9257825654299Cd15F2dD7

### 4. Smart Contract Details

The BYDC smart contract is built using OpenZeppelin libraries to ensure the highest levels of security and auditability.

Trading will initially remain disabled until marketing and partnership allocations are secured.

Once launched, ownership will be automatically renounced — guaranteeing decentralization and trust among the community.

### 5. Utility & Ecosystem

#### 5.1 BYDC Pay – EV Payment Revolution

BYDC Pay is a crypto payment gateway that allows users to:

- Purchase electric vehicles using digital currencies,
- Pay for charging sessions,
- And buy EV-related accessories and services.

Transactions are instant and low-cost, supported by leading Web3 wallets such as MetaMask and Trust Wallet.

## 5.2 NFT Vehicle Certificates

Vehicles purchased through BYDC can be issued unique NFT-based digital certificates, which represent:

- Transparent proof of ownership,
- Vehicle maintenance records, and
- Access to loyalty and reward programs.

Each car gains a digital identity that's verifiable and stored securely on the blockchain.

## 5.3 Charging & Rewards Ecosystem

BYDC will collaborate with EV charging networks and green energy providers to enable users to:

- Pay directly in BYDC tokens,
- Earn BYDC rewards for frequent usage, and
- Build a greener mobility ecosystem powered by crypto.

## 5.4 The BYDC Mobility App

The upcoming BYDC mobile app (beta) will allow users to:

- Explore electric vehicles available for purchase,
- Locate nearby charging stations,
- Manage their NFT certificates,
- And make secure Web3 payments through a seamless interface.

## 6. Transparency & Governance

BYDC operates with complete transparency.

All transactions, fund allocations, and partnership details are verifiable on-chain.

As the community grows, BYDC will transition into a DAO (Decentralized Autonomous Organization), granting token holders the right to vote on:

- New partnerships,
- Exchange listings, and
- Green mobility initiatives.

## 7. Legal & Compliance

BYDC complies with global decentralized project standards.

KYC/AML procedures may be activated when forming partnerships with dealerships or corporate partners.

The project is not a security or investment offering, and users are encouraged to conduct their own research and risk assessment.

BYDC is fully community-driven, transparent, and decentralized by design.

## 8. Roadmap – Expanding Electric Mobility

### Q4 2025 — Official Launch & Foundation

- Launch on BNB Smart Chain
- Official website and brand release
- Initial marketing campaign and community building
- Preliminary outreach to sustainable mobility projects

### Q1 2026 — Listings & Infrastructure Development

- Listing on CoinMarketCap and CoinGecko
- First CEX (Centralized Exchange) listings
- Building technical partnerships in blockchain and Web3 payment integrations

### Q2 2026 — Launch of BYDC Pay & NFT Vehicle Certificates

- Launch of BYDC Pay for EV purchases and charging payments
- Rollout of NFT Vehicle Certificates for ownership and loyalty rewards
- Pilot testing of payment gateways with small-to-mid dealerships

### Q3–Q4 2026 — App Launch & EV Dealership Integration

- Beta release of the BYDC App (Android & iOS)
- Expansion into key markets across Asia, Europe, and the Middle East
- Adoption of BYDC as a recognized payment option by selected EV dealerships once the community reaches significant scale and trust

### 2027 — DAO Governance & Major Partnerships

- Activation of DAO-based governance and community voting
- Strategic collaborations with EV manufacturers and charging networks
- Expansion of BYDC utility into broader mobility sectors (EV rentals, fleet management, and home charging solutions)

## ⚡ Final Message

BYDC is not just a cryptocurrency — it's a revolution in smart payments and sustainable mobility.

Together, we're building a cleaner, smarter, and freer world.

**Build Your Dream. Build Your Car. Build Your Coin.**
